Dear Hiring Team,

I am writing to express my interest in the Software Engineering Internship position at your esteemed company. As a motivated software engineering student with a strong background in programming, backend development, and containerization, I am eager to contribute meaningfully to your team.

I am currently a student at 1337 Coding School, where I have gained extensive knowledge in software engineering, data structures, and network programming. My coursework and projects have helped me build skills in Python, JavaScript, C, C++, and Docker. Some of my key experiences include developing a real-time multiplayer game backend and designing a high-performance HTTP server.

I am particularly interested in joining your company as I believe it will provide an excellent environment for me to learn quickly and tackle new challenges. I am adaptable, collaborative, and committed to finding efficient solutions to complex problems. I am confident that my skills in backend development, REST APIs, and real-time communication would make me a valuable member of your team.

Thank you very much for considering my application. I would be excited to further discuss how I could support your team. Please feel free to contact me at your earliest convenience.

Best regards,
Youssef Sabr
